

# HOLOMORPHE

*Think about Stanley Meyer's water electrolyser !*

**Make water the new coal for a better tomorrow**

Sale of fundamental research of patent us 4661747A

Patent US4661747A - Efficient electrical conversion switching tube suitable for inductive loads - Inventor : Edwin V. Gray, Sr.

See the patent

Product

The product is a fundamental research about the invention above and this fundamental research is delivered under a PDF file.

In this invention, we have to understand the following theories :

- Quantum mechanics
- Thermodynamics
- Plasma physics
- Photoelectric effect
  - Ionization
- Complex numbers
- Differential equation
- Electromagnetism

Pricing

The product costs 5 000.00 euros without taxes.

Types of payment

Bank transfer

Types of delivery

File transfer service

Email
